Monitor, *Grant & Revoke*

The Taymor Protect app stores up to 10 manager codes including the owner code at any time. You can also monitor entry and exit records, set custom durations, grant one-time access codes, and issue temporary codes for owners, guests, and tenants. Improve access and accountability during project construction, give each trade a unique code or grant specific access time frames for each unit entry. Grant temporary access codes that deliver peace of mind and save you time. Simplify costly key management with the Centinel 3 smart lock solution.

Control with *Bluetooth*

You can unlock, lock, and configure through Bluetooth BLE with AES128-bit encryption when within range. Secure smart locks use the latest Bluetooth technology for worry-free functionality, with no need for extra hubs or equipment.

Keys *not Required*

There is no need to carry keys which can get lost or stolen, as it can be addressed with your phone. With no mechanical key required, locksmiths no longer need to be called when a tenant moves out as Centinel 3 Bluetooth can be digitally re-keyed.
